PrinterOn Enterprise

## Secure enterprise printing platform

Make printing easier, for everyone

PrinterOn Enterprise is the industry-leading secure printing solution that enables printing from any laptop, desktop or mobile device, to any printer, no matter the networks in between. PrinterOn Enterprise is a centrally managed solution and is recommended for larger organizations, or those with complex workflow requirements. With PrinterOn Enterprise, you get a combined solution that enables secure print, tracking and management of all print workflows whether desktop or mobile.

If you are thinking about moving your infrastructure to the cloud, PrinterOn Enterprise has the key infrastructure in place so that you can run your print services in the cloud right now, or stay on-premise until you decide to go to the cloud in the future. The choice is yours.

PrinterOn Enterprise

· works with any device, any network, whether on-premise or third-party cloud
· is a secure, reliable and proven print solution
· is modular, scalable and flexible so that it grows with your business
· offers a consistent print experience whether in or out of the office
· supports cloud-based SSO and OpenID Connect-compatible identity
  management solutions, including Azure AD
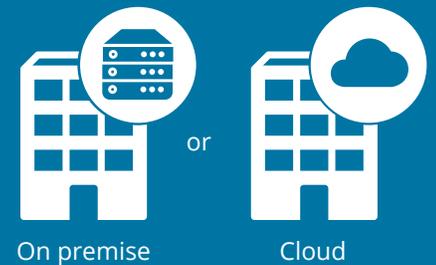

On premise   or   Cloud

PrinterOn Enterprise can be deployed and managed on-premise or in any third-party cloud, providing the flexibility you need and complete control over your print service wherever it resides.

Key infrastructure for a complete, secure printing solution

With PrinterOn Enterprise, you get access to all the features required for a complete, secure on-premise printing solution, or third-party cloud, if desired. It is the only solution that offers this level of flexibility and the features required to solve virtually any print problem, no matter the workflow, network, device or industry.

Mobile Printing

PrinterOn iOS and Android printing apps with MDM versions for BlackBerry (Good), AirWatch, MobileIron, Citrix and Intune

Pull Printing

PrinterOn Secure Release Anywhere™ provides pull print, tracking and management of mobile and desktop print workflows

Remote Printing

Securely connect to printers on remote networks no matter where they are located, without the use of VPN

Desktop Printing with PrintWhere®

PrintWhere® provides native Windows printing and reporting for any desktop/laptop or Surface tablet

Features that support your business today, whether on-premise or in the cloud

SSO/IDM – Single Sign On and Identity Management enables authentication securely across networks without sharing user credentials

OpenID Connect Support – PrinterOn Enterprise supports any OpenID Connect-compatible IDM solution including Azure AD, Okta, Centrify, Ping Identity and OneLogin

Microsoft Azure AD Support – PrinterOn extended support improves workflows and makes configuration easier

MDM/MAM Integration – PrinterOn Enterprise supports the most popular MDM solutions such as Citrix Xen Mobile, AirWatch, BlackBerry (Good), MobileIron and Intune with specific mobile apps for each

HP Access Control Support – All PrinterOn print workflows can be enabled for the HP Access Control server providing secure card release, pull printing and job tracking

Smart Print Path - The smart print path feature of PrintWhere automatically picks the best print path (shortest, fastest, least costly) and compresses files for up to 75% bandwidth savings and faster print

IDM support for Mobile Apps – PrinterOn mobile apps support third-party IDM and form-based authentication services

Your print challenges are our business

PrinterOn Enterprise solves the print challenges that businesses encounter every day. But it doesn't stop there. PrinterOn is always ready to go wherever your corporate roadmap takes you. Whether you expand your business globally, complete an acquisition or move to the cloud, PrinterOn Enterprise is always ready to move with you.

Print Challenge	Solution
Do I currently have business apps in a third-party cloud that need access to print?	PrinterOn Enterprise deployed alongside your business applications in a third-party cloud will provide access to all of your printers on the local trusted network as well as "off network" remote printers.
Do I need to quickly enable print at new office locations without the hassle and high cost of VPN?	With remote printing capability, a print network can be set up in hours, not days. It can reduce the time and resources required to provide print at new locations and connects all of your networks for secure print across an entire organization.
Do I need to print shipping documents, medical results or purchase orders to third-party locations?	With PrinterOn Enterprise, documents can be printed across disparate networks to another supplier or manufacturer without having a direct network connection in place, which reduces implementation time and saves money.
Do I need employees' home office printing to be secure and trackable?	PrinterOn Enterprise's ability to connect a mobile device or laptop to a secure printer, no matter the networks in between, provides this flexibility. Printing can be done from a laptop, PC, or mobile device, and all documents submitted are kept secure and tracked, even from a home office.
